Sr. Director of Infrastructure

MOVADO

Unstructured file data is exploding

Legacy storage structures are ill-equipped to for collaborating over and transferring large files. Organizations need a modern approach that simplifies IT infrastructure for ever-growing file data.

The Nasuni File Data Platform unifies data into a single source of truth, creating new levels of control, flexibility, and protection. This accelerates time to market, enhances multi-team collaboration, and improves supply chain resiliency.

Optimized IT efficiency

Traditional enterprise storage can't scale infinitely, provide high performance at the edge, or deliver consistent security across sites. Nasuni hybrid cloud storage consolidates file data in easily expandable, highly durable object storage such as Amazon S3, Azure Blob, and Google Cloud at a fraction of the cost of on-premises or other cloud solutions.

- **Unlimited users**, files, volumes, etc.
- **4x faster** post-merger integrations
- **5x acceleration** of multi-location workflows
- **20% reduction** in overwrites and version conflicts

Real-time resilience

Protect the entire supply chain. When disaster strikes, Nasuni's unlimited, immutable Recovery Point Objectives and industry-leading recovery instantly restore operations everywhere.

15-minute ransomware mitigation

1M files per minute recovery capabilities

96% quicker recovery times after operational shutdowns

Maximum cost savings

Data storage shouldn't be a burden. Gain pay-as-you-grow storage capacity in the cloud that decouples storage growth from local hardware – and a collaborative work space that puts time back in employees' day.

- **30% storage savings** compared to SaaS alternatives
- **20% reduction on costs** related to over-estimating pre-paid storage
- **Built-in analytics** and business intelligence capabilities
- **Advanced data curation** and analysis for AI applications

Data storage designed for smoother workflows, stronger resilience, and AI agility

Set teams free from outdated infrastructure with the only cloud-native platform for data and storage services. A fluid approach lets organizations extract every bit of value from their data, streamlining collaborative workflows to shorten production cycles.

Unified global file system

Secure and streamline IT infrastructure

- Optimized for the cloud
- Single source of truth for all data
- No limits for files, folders, snapshots, and more
- Built-in backups with unlimited versioning
- Integrated disaster recovery
- File restoration in minutes

Industry-leading ransomware protection

Detect and contain threats 24/7

- Monitors for known threats and zero-day attacks
- Automatic mitigation contains threats at the edge
- Guided restore eliminates detective work
- Corrupted files restored in minutes
- Automated reporting

Flexible cloud operating model

Adapt to business and workforce changes at scale

- Compatible with any combination of on-premises, edge, and cloud solutions
- Public and private cloud support
- Enables organizations to avoid vendor lock-in
- Connects with third-party systems that serve data

Intelligent edge cache

Balance global accessibility and local performance

- On-premises or in-the-cloud cache
- Fast read/write to active files
- Dynamic synchronization to all locations
- "Set and forget" data management

Actionable analytics

Accelerate ROI and lower costs

- Intuitive data intelligence gathering
- Seamless interfacing between AI applications, data, and users
- Insights on resource usage, user behavior, and more

NASUNI

Nasuni is a unified file data platform for enterprises facing an explosion of unstructured data, combining storage and data services into a single hybrid cloud solution.

Nasuni's approach enables business resiliency and better data management, while providing solutions that drive IT efficiency – cutting infrastructure costs by up to 65%. The Nasuni File Data Platform replaces friction associated with legacy infrastructure with optimized infrastructure flow, supporting modern enterprise expectations for data analytics and business insights, and helping businesses transform data from obstacle to opportunity.
