

Nasuni File IQ Premium:

Enhanced file analytics and data management

Introduction

Nasuni File IQ Premium is a powerful set of analytics capabilities specifically designed for the Nasuni File Data Platform. The Premium edition extends visibility and awareness of user and file activity with proactive alerting and more robust reporting. Nasuni File IQ Premium offers global data visibility to proactively monitor, report, and manage your unstructured file data.

Nasuni File IQ Premium reporting goes beyond the dashboards and reporting available in the Basic version of Nasuni File IQ, allowing companies to proactively be alerted to anomalies and suspicious behavior. Be instantly aware of unplanned storage growth spikes, discover data quickly with file metadata queries, and proactively plan for growth and evolving usage patterns. With File IQ Premium, you will have the sophisticated analytics necessary to ensure your organization gets the maximum value from your file data and ensure that you have properly identified, structured, and curated your data for use in AI-driven business initiatives.

Better visibility and control with Nasuni File IQ Premium

- Proactive threshold-based notifications:** Receive proactive notifications on file system anomalies based on specific criteria via customizable templates sent via email or Slack.
- Access control:** Active Directory integration provides segmented administrative rights to dashboards. This is ideal for larger Nasuni implementations that wish to distribute monitoring and management tasks.
- Flexible integration:** Extend access to file metadata with API-level connections for applications.
- Fast file discovery:** Advanced filtering functionality to quickly locate files based on various file attributes.
- AI workflow automation:** Identify and automate AI integrations using Nasuni-stored data.

Put Nasuni File IQ Premium to work:

Enable your organization to:

- **Improve the identification of file data** for use within specific applications and processes.
- **Empower the safe and secure use of AI services** that include Nasuni-managed data for the most accurate outcomes.
- **Effectively serve your user community** with improved file location capabilities.
- **Improve data security** with proactive notification of unusual file access behaviors and reduce the threat of exfiltration or other nefarious activity.
- **Integrate applications** that benefit from data access with API access to file metadata.
- **Simplify administration** with distributed responsibilities, segmented administrative roles, and permissions for managing Nasuni File IQ.
